## Paper 2 (Calculator)

**Higher Tier**

Thursday 8 June 2017 – Morning

**Time: 1 hour 30 minutes**

Paper Reference

**1MA1/2H**

**You must have:** Ruler graduated in centimetres and millimetres, protractor, pair of compasses, pen, HB pencil, eraser, calculator. Tracing paper may be used.

Total Marks

### Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- You must **show all your working**.
- Diagrams are **NOT** accurately drawn, unless otherwise indicated.
- **Calculators may be used.**
- If your calculator does not have a  $\pi$  button, take the value of  $\pi$  to be 3.142 unless the question instructs otherwise.

### Information

- The total mark for this paper is 80.
- The marks for **each** question are shown in brackets – *use this as a guide as to how much time to spend on each question.*

### Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.

P 4 8 1 4 8 R A 0 1 2 4

  
**Pearson**

**Answer ALL questions.**

**Write your answers in the spaces provided.**

**You must write down all the stages in your working.**

- 1** The table shows the probabilities that a biased dice will land on 2, on 3, on 4, on 5 and on 6

Number on dice	1	2	3	4	5	6
Probability		0.17	0.18	0.09	0.15	0.1

Neymar rolls the biased dice 200 times.

Work out an estimate for the total number of times the dice will land on 1 or on 3

(Total for Question 1 is 3 marks)

- 2 On Saturday, some adults and some children were in a theatre.  
The ratio of the number of adults to the number of children was 5 : 2

Each person had a seat in the Circle or had a seat in the Stalls.

$\frac{3}{4}$  of the children had seats in the Stalls.

117 children had seats in the Circle.

There are exactly 2600 seats in the theatre.

On this Saturday, were there people on more than 60% of the seats?  
You must show how you get your answer.

(Total for Question 2 is 5 marks)

- 3 The diagram shows a prism with a cross section in the shape of a trapezium.

On the centimetre grid below, draw the front elevation and the side elevation of the prism. Use a scale of 2 cm to 1 m.

(Total for Question 3 is 4 marks)

- 4 Olly drove 56 km from Liverpool to Manchester.  
He then drove 61 km from Manchester to Sheffield.

Olly's average speed from Liverpool to Manchester was 70 km/h.  
Olly took 75 minutes to drive from Manchester to Sheffield.

- (a) Work out Olly's average speed for his total drive from Liverpool to Sheffield.

..... km/h  
(4)

Janie drove from Barnsley to York.

Janie's average speed from Barnsley to Leeds was 80 km/h.  
Her average speed from Leeds to York was 60 km/h.

Janie says that the average speed from Barnsley to York can be found by working out the mean of 80 km/h and 60 km/h.

- (b) If Janie is correct, what does this tell you about the two parts of Janie's journey?

.....  
.....  
(1)

(Total for Question 4 is 5 marks)

5

$ABC$  and  $EDC$  are straight lines.  
 $EA$  is parallel to  $DB$ .

$$EC = 8.1 \text{ cm.}$$

$$DC = 5.4 \text{ cm.}$$

$$DB = 2.6 \text{ cm.}$$

(a) Work out the length of  $AE$ .

..... cm  
 (2)

$$AC = 6.15 \text{ cm.}$$

(b) Work out the length of  $AB$ .

..... cm  
 (2)

(Total for Question 5 is 4 marks)

6

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

- 6 Anil wants to invest £25 000 for 3 years in a bank.

**Personal Bank**

Compound Interest

2% for each year

**Secure Bank**

Compound Interest

4.3% for the first year  
0.9% for each extra year

Which bank will give Anil the most interest at the end of 3 years?  
You must show all your working.

(Total for Question 6 is 3 marks)

- 7 A number,  $n$ , is rounded to 2 decimal places.  
The result is 4.76

Using inequalities, write down the error interval for  $n$ .

(Total for Question 7 is 2 marks)

- 8 The cumulative frequency graph shows some information about the heights, in cm, of 60 students.

Work out an estimate for the number of these students with a height greater than 160 cm.

(Total for Question 8 is 2 marks)

- 9 The diagram shows triangle **A** drawn on a grid.

Kyle reflects triangle **A** in the  $x$ -axis to get triangle **B**.

He then reflects triangle **B** in the line  $y = x$  to get triangle **C**.

Amy reflects triangle **A** in the line  $y = x$  to get triangle **D**.

She is then going to reflect triangle **D** in the  $x$ -axis to get triangle **E**.

Amy says that triangle **E** should be in the same position as triangle **C**.

Is Amy correct?

You must show how you get your answer.

(Total for Question 9 is 3 marks)

10 The table shows some information about eight planets.

Planet	Distance from Earth (km)	Mass (kg)
Earth	0	$5.97 \times 10^{24}$
Jupiter	$6.29 \times 10^8$	$1.898 \times 10^{27}$
Mars	$7.83 \times 10^7$	$6.42 \times 10^{23}$
Mercury	$9.17 \times 10^7$	$3.302 \times 10^{23}$
Neptune	$4.35 \times 10^9$	$1.024 \times 10^{26}$
Saturn	$1.28 \times 10^9$	$5.68 \times 10^{26}$
Uranus	$2.72 \times 10^9$	$8.683 \times 10^{25}$
Venus	$4.14 \times 10^7$	$4.869 \times 10^{24}$

(a) Write down the name of the planet with the greatest mass.

.....  
(1)

(b) Find the difference between the mass of Venus and the mass of Mercury.

..... kg  
(1)

Nishat says that Neptune is over a hundred times further away from Earth than Venus is.

(c) Is Nishat right?

You must show how you get your answer.

.....  
(2)

(Total for Question 10 is 4 marks)

11 Solve  $\frac{3x-2}{4} - \frac{2x+5}{3} = \frac{1-x}{6}$

$$x = \dots\dots\dots$$

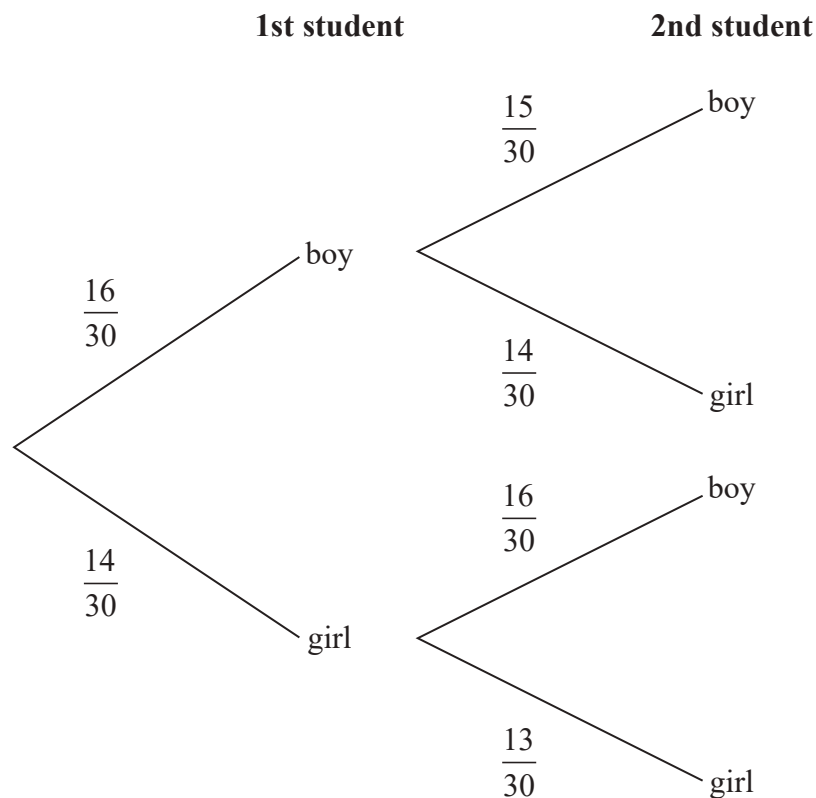

(Total for Question 11 is 4 marks)

- 12 There are 30 students in Mr Lear's class.  
16 of the students are boys.

Two students from the class are chosen at random.

Mr Lear draws this probability tree diagram for this information.

- (a) Write down **one** thing that is wrong with the probabilities in the probability tree diagram.

(1)

Owen and Wasim play for the school football team.

The probability that Owen will score a goal in the next match is 0.4

The probability that Wasim will score a goal in the next match is 0.25

Mr Slater says,

“The probability that both boys will score a goal in the next match is  $0.4 + 0.25$ ”

- (b) Is Mr Slater right?

Give a reason for your answer.

(1)

(Total for Question 12 is 2 marks)

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

13 The histogram shows some information about the ages of the 134 members of a sports club.

20% of the members of the sports club who are over 50 years of age are female.

Work out an estimate for the number of female members who are over 50 years of age.

(Total for Question 13 is 3 marks)

14 Here are some graphs.

In the table below, match each equation with the letter of its graph.

Equation	Graph
$y = \sin x$	
$y = x^3 + 4x$	
$y = 2^x$	
$y = \frac{4}{x}$	

(Total for Question 14 is 3 marks)

15  $A$ ,  $B$ ,  $C$  and  $D$  are four points on the circumference of a circle.

$AEC$  and  $BED$  are straight lines.

Prove that triangle  $ABE$  and triangle  $DCE$  are similar.  
You must give reasons for each stage of your working.

(Total for Question 15 is 3 marks)

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

16 Using algebra, prove that  $0.1\dot{3}\dot{6} \times 0.\dot{2}$  is equal in value to  $\frac{1}{33}$

(Total for Question 16 is 3 marks)

$ONQ$  is a sector of a circle with centre  $O$  and radius 11 cm.

$A$  is the point on  $ON$  and  $B$  is the point on  $OQ$  such that  $AOB$  is an equilateral triangle of side 7 cm.

Calculate the area of the shaded region as a percentage of the area of the sector  $ONQ$ .  
Give your answer correct to 1 decimal place.

.....%

(Total for Question 17 is 5 marks)

18  $16^{\frac{1}{5}} \times 2^x = 8^{\frac{3}{4}}$

Work out the exact value of  $x$ .

(Total for Question 18 is 3 marks)

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

- 19  $2 - \frac{x+2}{x-3} - \frac{x-6}{x+3}$  can be written as a single fraction in the form  $\frac{ax+b}{x^2-9}$  where  $a$  and  $b$  are integers.

Work out the value of  $a$  and the value of  $b$ .

$$a = \dots\dots\dots$$

$$b = \dots\dots\dots$$

(Total for Question 19 is 4 marks)

20 The diagram shows part of the graph of  $y = x^2 - 2x + 3$

- (a) By drawing a suitable straight line, use your graph to find estimates for the solutions of  $x^2 - 3x - 1 = 0$

.....  
(2)

$P$  is the point on the graph of  $y = x^2 - 2x + 3$  where  $x = 2$

- (b) Calculate an estimate for the gradient of the graph at the point  $P$ .

.....  
(3)

(Total for Question 20 is 5 marks)

- 21 The diagram shows 3 identical circles inside a rectangle.  
Each circle touches the other two circles and the sides of the rectangle, as shown in the diagram.

The radius of each circle is 24 mm.

Work out the area of the rectangle.

Give your answer correct to 3 significant figures.

..... mm<sup>2</sup>

(Total for Question 21 is 4 marks)

**22** Here are the first five terms of a sequence.

4            11            22            37            56

Find an expression, in terms of  $n$ , for the  $n$ th term of this sequence.

(Total for Question 22 is 3 marks)

23 **L** is the circle with equation  $x^2 + y^2 = 4$

$P\left(\frac{3}{2}, \frac{\sqrt{7}}{2}\right)$  is a point on **L**.

Find an equation of the tangent to **L** at the point  $P$ .

## **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at [www.edexcel.com](http://www.edexcel.com) or [www.btec.co.uk](http://www.btec.co.uk). Alternatively, you can get in touch with us using the details on our contact us page at [www.edexcel.com/contactus](http://www.edexcel.com/contactus).

## **Pearson: helping people progress, everywhere**

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: [www.pearson.com/uk](http://www.pearson.com/uk)

## General marking guidance

These notes offer general guidance, but the specific notes for examiners appertaining to individual questions take precedence.

- 1 All candidates must receive the same treatment. Examiners must mark the last candidate in exactly the same way as they mark the first.

Where some judgement is required, mark schemes will provide the principles by which marks will be awarded; exemplification/indicative content will not be exhaustive. When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the response should be sent to review.

- 2 All the marks on the mark scheme are designed to be awarded; mark schemes should be applied positively. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme. If there is a wrong answer (or no answer) indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.

**Questions where working is not required:** In general, the correct answer should be given full marks.

**Questions that specifically require working:** In general, candidates who do not show working on this type of question will get no marks – full details will be given in the mark scheme for each individual question.

- 3 **Crossed out work**

This should be marked **unless** the candidate has replaced it with an alternative response.

- 4 **Choice of method**

If there is a choice of methods shown, mark the method that leads to the answer given on the answer line.

If no answer appears on the answer line, mark both methods **then award the lower number of marks**.

- 5 **Incorrect method**

If it is clear from the working that the "correct" answer has been obtained from incorrect working, award 0 marks. Send the response to review for your Team Leader to check.

**6 Follow through marks**

Follow through marks which involve a single stage calculation can be awarded without working as you can check the answer, but if ambiguous do not award.

Follow through marks which involve more than one stage of calculation can only be awarded on sight of the relevant working, even if it appears obvious that there is only one way you could get the answer given.

**7 Ignoring subsequent work**

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question or its context. (e.g. an incorrectly cancelled fraction when the unsimplified fraction would gain full marks).

It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect (e.g.. incorrect algebraic simplification).

**8 Probability**

Probability answers must be given as a fraction, percentage or decimal. If a candidate gives a decimal equivalent to a probability, this should be written to at least 2 decimal places (unless tenths).

Incorrect notation should lose the accuracy marks, but be awarded any implied method marks.

If a probability answer is given on the answer line using both incorrect and correct notation, award the marks.

If a probability fraction is given then cancelled incorrectly, ignore the incorrectly cancelled answer.

**9 Linear equations**

Unless indicated otherwise in the mark scheme, full marks can be gained if the solution alone is given on the answer line, or otherwise unambiguously identified in working (without contradiction elsewhere). Where the correct solution only is shown substituted, but not identified as the solution, the accuracy mark is lost but any method marks can be awarded (embedded answers).

**10 Range of answers**

Unless otherwise stated, when an answer is given as a range (e.g.  $3.5 - 4.2$ ) then this is inclusive of the end points (e.g. 3.5, 4.2) and all numbers within the range.

### Guidance on the use of abbreviations within this mark scheme

<b>M</b>	method mark awarded for a correct method or partial method
<b>P</b>	process mark awarded for a correct process as part of a problem solving question
<b>A</b>	accuracy mark (awarded after a correct method or process; if no method or process is seen then full marks for the question are implied but see individual mark schemes for more details)
<b>C</b>	communication mark
<b>B</b>	unconditional accuracy mark (no method needed)
<b>oe</b>	or equivalent
<b>cao</b>	correct answer only
<b>ft</b>	follow through (when appropriate as per mark scheme)
<b>sc</b>	special case
<b>dep</b>	dependent (on a previous mark)
<b>indep</b>	independent
<b>awrt</b>	answer which rounds to
<b>isw</b>	ignore subsequent working

Paper: 1MA1/2H				
Question	Working	Answer	Mark	Notes
4 (a)		57.1	P1	for a process to find time from Liverpool to Manchester, eg. $56 \div 70$ (= 0.8 (hrs) or 48 (mins))
			P1	for a process to find total distance, eg. $56 + 61$ (= 117)
				or the total time, eg. "48" + 75 (= 123) or "0.8" + $\frac{75}{60}$ (= 2.05) with consistent units of time
			P1	(dep P2) for a correct process to find average speed with consistent units of time, eg. "117" $\div$ "2.05" or "117" $\div$ "123"
			A1	for answer in the range 57 to 57.1
(b)		explanation	C1	for explaining that the time taken for the two parts of the journey must be the same or the distance from Leeds to York is $\frac{3}{4}$ of the distance from Barnsley to Leeds
5 (a)		3.9	M1	for a ratio of $\frac{8.1}{5.4}$ (=1.5) oe or $\frac{5.4}{8.1}$ (=0.66..) oe
				or $\frac{2.6}{5.4}$ (= 0.48..) oe or $\frac{5.4}{2.6}$ (= 2.07..) oe
			A1	cao
(b)		2.05	M1	for $\frac{5.4}{8.1} \times 6.15$ oe (= 4.1) or $\frac{2.7}{8.1} \times 6.15$ oe or ft "scale factor" from (a)
			A1	cao

Paper: 1MA1/2H				
Question	Working	Answer	Mark	Notes
6		Secure Bank (supported)	P1  P1  C1	for a process to work out the interest after one year e.g. $0.02 \times 25000$ (=500) or $0.043 \times 25000$ (=1075) or for 1.02 or 25500 or 1.043 or 26075  for process to find value of the investment after 3 years or the multiplicative factor for 3 years at one of the banks, e.g. $25000 \times 1.02 \times 1.02 \times 1.02$ oe (= 26530...) or $1.02^3$ (= 1.0612...) or $25000 \times 1.043 \times 1.009 \times 1.009$ oe (= 26546...) or $1.043 \times 1.009 \times 1.009$ (= 1.0618.....) [accept total interest of 1530.. or 1546.. if final values of investment are not found] for Secure Bank from correct figures, eg. 26530.. and 26546.. or 1530... and 1546... or 1.0612... and 1.0618...
7		$4.755 \leq n < 4.765$	B2 [B1]	for $4.755 \leq n < 4.765$ for 4.755 or 4.765 or 4.7649]
8		12	M1 A1	for evidence of taking a reading from the graph from $h = 160$ for answer in the range 11.8 to 12.2
9		No (supported)	M2 [M1 C1   M2  C1	for the correct position of C or E for a correct position of B or D] for No with correct supporting evidence, eg. showing C and E in the correct positions  OR  for C is a rotation of $90^\circ$ anticlockwise about $O$ <b>or</b> E is a rotation of $90^\circ$ clockwise about $O$ for No with supporting evidence, eg. C is a rotation of $90^\circ$ anticlockwise about $O$ <b>and</b> E is a rotation of $90^\circ$ clockwise about $O$ .

Paper: 1MA1/2H				
Question	Working	Answer	Mark	Notes
10 (a)		Jupiter	B1	for Jupiter (accept $1.898 \times 10^{27}$ )
(b)		$4.5388 \times 10^{24}$	B1	for $4.5388 \times 10^{24}$ oe (e.g. $45.388 \times 10^{23}$ )
(c)		Yes (supported)	M1  A1	for $(4.35 \times 10^9) \div (4.14 \times 10^7)$ (= 105(.07..)) or $(4.14 \times 10^7) \times 100$ (= $4.14 \times 10^9$ ) or $(4.35 \times 10^9) \div 100$ (= $4.35 \times 10^7$ ) for Yes with correct supporting evidence
11		$9\frac{1}{3}$	M1  M1  M1  A1	for writing at least 2 fractions with a common denominator eg. $\frac{3(3x-2)}{12}, \frac{4(2x+5)}{12}, \frac{2(1-x)}{12}$ with at least one correct numerator or for $\frac{3x}{4} - \frac{2}{4} - \frac{2x}{3} - \frac{5}{3} = \frac{1}{6} - \frac{x}{6}$ (accept $+\frac{5}{3}$ instead of $-\frac{5}{3}$ )  (dep) for a method to eliminate all fractions in an equation, ignore errors in any expanded terms eg. $3(3x - 2) - 4(2x + 5) = 2(1 - x)$ or $6 \times [3(3x - 2) - 4(2x + 5)] = 12 \times [1 - x]$ or $3 \times 3x - 3 \times 2 - 4 \times 2x - 4 \times 5 = 2 \times 1 - 2 \times x$  OR for the correct expansion of brackets leading to $\frac{9x-6-8x-20}{12} = \frac{2-2x}{12}$  (dep on M2) for correctly isolating terms in $x$ and number terms of their linear equation e.g. $9x - 8x + 2x = 2 + 6 + 20$ for $9\frac{1}{3}$ oe

Paper: 1MA1/2H				
Question	Working	Answer	Mark	Notes
12 (a)		comment	C1	for comment e.g. incorrect denominator for the 2nd student or probabilities for 2 <sup>nd</sup> student do not add up to 1
(b)		No (supported)	C1	for "no" with supporting evidence, e.g. probabilities should be multiplied together or $0.4 \times 0.25$
13		7	P1          P1    A1	for correct process to find any frequency, eg. $"1.1" \times 10 (= 11)$ or $"2.8" \times 10 (= 28)$ or $"2.3" \times 20 (= 46)$ or $"1.4" \times 20 (= 28)$ or $"1.4" \times 10 (= 14)$ or $"0.7" \times 30 (= 21)$  or for a correct process to find the total area and an area of any block, eg. using $1 \text{ cm}^2 = 1$ unit of area to get 53.6 and one of 4.4, 11.2, 18.4, 11.2, 5.6, 8.4  (dep P1) for complete process to find 20% of $(\text{"1.4"} \times 10 + \text{"0.7"} \times 30)$ , eg. $\frac{20}{100} \times \text{"35"}$ or $\frac{\text{"5.6"} + \text{"8.4"}}{53.6} \times 134 \times \frac{20}{100}$ cao
14		C, F, A, H	B3 [B2 [B1	for a fully correct table for 2 or 3 correct] for 1 correct]

Paper: 1MA1/2H				
Question	Working	Answer	Mark	Notes
15		Proof	<p>C1</p> <p>C1</p> <p>C1</p>	<p>for identifying one pair of equal angles with a correct reason, e.g. (angle) <math>BAE = (\text{angle}) CDE</math>; <u>angles</u> in the same <u>segment</u> are equal or <u>angles</u> at the circumference <u>subtended</u> on the same <u>arc</u> are equal or for identifying two pairs of equal angles with no correct reasons given (angles must be within the appropriate triangles)</p> <p>for identifying a second pair of equal angles with a correct reason, e.g. (angle) <math>AEB = (\text{angle}) DEC</math>; <u>opposite angles</u> or <u>vertically opposite angles</u> are equal or for identifying the three pairs of equal angles with no correct reasons given</p> <p>for stating the three pairs of equal angles of the two triangles e.g. <math>ABE = DCE</math>, <math>BEA = CED</math>, <math>EAB = EDC</math> with fully correct reasons</p>
16			<p>M1</p> <p>M1</p> <p>C1</p> <p>OR</p> <p>M1</p> <p>M1</p> <p>C1</p>	<p>for the start of a method to convert 0.22.. to a fraction, eg <math>10y = 2.22..</math> or <math>(y =) \frac{2}{9}</math></p> <p>for the start of a method to convert 0.13636... to a fraction, <math>10x = 1.3636..</math> or <math>100x = 13.6363...</math> or <math>1000x = 136.3636..</math> or <math>(x =) \frac{13.5}{99}</math> or <math>(x =) \frac{135}{990}</math></p> <p>for correct arithmetic and concluding the proof</p> <p>OR</p> <p>for <math>0.\dot{1}\dot{3}\dot{6} \times 0.\dot{2} = 0.\dot{0}\dot{3} (= z)</math></p> <p>for complete method to find two appropriate recurring decimals the difference of which is a rational number, eg. <math>100z = 3.0303..., (z =) 0.0303... \text{ or } \frac{3}{99}</math></p> <p>for correct arithmetic and concluding the proof</p>

Paper: 1MA1/2H				
Question	Working	Answer	Mark	Notes
17		66.5	B1 P1 P1 P1 A1	for recognising an angle of 60 at $AOB$ for a process to find the area of the sector, e.g. $\frac{60}{360} \times \pi \times 11^2$ (= 63.3.. or $\frac{121\pi}{6}$ ) for a process to find the area of the triangle, e.g. $\frac{1}{2} \times 7^2 \times \sin 60$ (=21.2.. or $\frac{49\sqrt{3}}{4}$ ) for a process to find the required percentage, eg. $\frac{63.3.. - 21.2..}{63.3..} \times 100$ for answer in the range 66.5 to 66.6
18		1.45	P1 P1 A1 P1 A2	for converting to a common base with at least one correct conversion, eg. $(16 =) 2^4$ or $(8 =) 2^3$ (dep) for correct use of index laws to derive an equation, eg. $4 \times \frac{1}{5} + x = 3 \times \frac{3}{4}$ oe for 1.45 oe (accept $2^{1.45}$ ) OR for a process to find the value of $2^x$ , eg. $8^{\frac{3}{4}} \div 16^{\frac{1}{5}} = 2.73...$ for 1.45 oe (accept $2^{1.45}$ )
19		$a = 4, b = -42$	M1 M1 M1 A1	for at least two terms from $2(x - 3)(x + 3)$ , $(x + 2)(x + 3)$ , $(x - 6)(x - 3)$ (dep) for the correct expansion of at least two expressions, irrespective of signs, eg. $2x^2 - 18$ , $x^2 + 2x + 3x + 6$ , $x^2 - 6x - 3x + 18$ oe for $2x^2 - 18 - x^2 - 5x - 6 - x^2 + 9x - 18$ for $a = 4, b = -42$ (accept $4x - 42$ )

Paper: 1MA1/2H				
Question	Working	Answer	Mark	Notes
20 (a)		−0.4 to −0.2 and 3.2 to 3.4	M1 A1	for $(y =) x + 4$ for answers in the range −0.4 to −0.2 and 3.2 to 3.4
(b)		1.6 to 2.5	M1 M1 A1	for drawing a tangent to the curve at $x = 2$ for method to find gradient of their tangent for answer in the range 1.6 to 2.5
21		8600	P1 P1 P1 A1	for process to find the length of the rectangle, e.g. $24 \times 4 (= 96)$ for process to find the perpendicular height of an equilateral triangle of side $(24 \times 2)$ cm, e.g. $48\sin 60 (= 41.5(69..))$ or $\sqrt{48^2 - 24^2} (= 24\sqrt{3} \text{ oe})$ for complete process to find the width of rectangle, e.g. “ $41.5(69..)$ ” + $24 + 24 (= 89.5(69..))$ for answer in the range 8592 to 8602
22		$2n^2 + n + 1$	M1 M1 A1	for a correct start to a method to find $n$ th term, eg. equal 2nd differences imply a term in $n^2$ or sight of $an^2 + bn + c$ for a method leading to $2n^2$ and either $n$ or 1 for $2n^2 + n + 1$ oe
23		$y = \frac{-3}{\sqrt{7}}x + \frac{8}{\sqrt{7}}$	M1 M1 A1	for method to find gradient of $OP$ , eg $\frac{\sqrt{7}}{2} \div \frac{3}{2} (= \frac{\sqrt{7}}{3} \text{ or } 0.88 \dots)$ oe  (dep) for method to find gradient of tangent, $m$ , eg. $\frac{\frac{\sqrt{7}}{2}}{\frac{3}{2}} \times m = -1$ ( $m = \frac{-3}{\sqrt{7}}$ or $-1.13..$ ) for $y - \frac{\sqrt{7}}{2} = \frac{-3}{\sqrt{7}}(x - \frac{3}{2})$ or $y = \frac{-3\sqrt{7}}{7}x + \frac{8\sqrt{7}}{7}$ oe or $y - 1.32.. = -1.13..(x - 1.5)$

## Modifications to the mark scheme for Modified Large Print (MLP) papers.

Only mark scheme amendments are shown where the enlargement or modification of the paper requires a change in the mark scheme.

The following tolerances should be accepted on marking MLP papers, unless otherwise stated below:

Angles:  $\pm 5^\circ$

Measurements of length:  $\pm 5$  mm

---

PAPER: 1MA1_2H		
Question	Modification	Mark scheme notes
1	Table turned to vertical format.	Standard mark scheme
3	Alternative question. Model has been provided for all candidates. Diagram enlarged and also provided for MLP. The measurements on the prism have been doubled. Wording added next to the diagram of the trapezium 'Diagram NOT accurately drawn'. Four shapes have been provided below the trapezium labelled A to D. Wording added above the four shapes 'scale: 2 cm to 1 metre'. Question wording has changed and has been split into two parts: 'Look at the model or at the diagrams for Question 19 in the Diagram Book. They show a prism with a cross section in the shape of a trapezium. All measurements are in metres. Below the prism there are four shapes A, B, C and D. (i) Which shape shows the front elevation of the prism? (ii) Which shape shows the side elevation of the prism?'	Mark scheme amended as follows: (i) B2 for C  (ii) B2 for A (B1 for B or D)
5	Diagram enlarged. Measurements '2.6 cm' and '5.4 cm' added to the diagram.	Standard mark scheme
8	Grid enlarged. Right axis labelled	Standard mark scheme but allow an answer in the range 11 to 13.

PAPER: 1MA1_2H		
Question	Modification	Mark scheme notes
9	<p>The question has changed and has been split into 3 parts, (a), (b) and (c). There is a separate grid with different triangles on each grid:</p> <ul style="list-style-type: none"> <li>(a) Triangles A and B have been drawn on the grid.</li> <li>(b) Triangles B and C have been drawn on the grid.</li> <li>(c) Triangles A, B, C and D have been drawn on the grid.</li> </ul> <p>The questions for each part now is:</p> <ul style="list-style-type: none"> <li>(a) It shows triangle A and triangle B given on a grid. Describe the single transformation that maps triangle A onto triangle B.</li> <li>(b) It shows triangle B and triangle C given on a grid. Describe the single transformation that maps triangle B onto triangle C.</li> <li>(c) It shows triangles A, B, C and D given on a grid. Amy reflects triangle A in the line <math>y = x</math> to get triangle D She is then going to reflect triangle D in the <math>x</math>-axis to get triangle E Amy says that triangle E should be in the same place as triangle C. Is Amy correct? You must show how you get your answer. There is a cut out shape available for you to use</li> </ul>	<p>The mark scheme for this amended question is as follows:</p> <ul style="list-style-type: none"> <li>(a) B1 for “reflection in the <math>x</math>-axis”</li> <li>(b) B1 for “reflection in the line <math>y = x</math>”</li> <li>(c) Standard mark scheme: for No with correct supporting evidence eg showing C and E in the correct positions or stating C is a reflection in the <math>y</math>-axis rather than the <math>x</math>-axis</li> </ul>
10	Rows ‘Mars’ and ‘Saturn’ removed. Wording ‘eight’ changed to ‘six’	Standard mark scheme.
11	MLP only: $x$ changed to $y$ .	Standard mark scheme but $x$ changed to $y$ .
12	Diagram enlarged. Wording added ‘It shows a probability tree diagram.’ Wording added ‘Mr Lear drew a probability tree diagram to show the information	Standard mark scheme.
13	Diagram enlarged. Right axis has been labelled. Lines on the histogram moved. 50-60 moved to 2.0; 60-90 moved to 0.5	Standard mark scheme.
14	Diagram enlarged. Wording added ‘There are four spaces to fill.’ Graphs labelled ‘Graph A, Graph B, Graph C’ etc.	Standard mark scheme.
15	Diagram enlarged.	Standard mark scheme.
17	Diagram enlarged. Shading changed to dotted shading.	Standard mark scheme.
19	MLP only: $x$ changed to $y$ .	Standard mark scheme but $x$ changed to $y$ .
20	Diagram enlarged.	Standard mark scheme.
21	Diagram enlarged.	Standard mark scheme.
